

Information and advice following a Cervix Punch Biopsy

Colposcopy Clinic Advice

Your treatment today involved taking a small sample of skin (punch biopsy) from your cervix. Silver nitrate was used to control the bleeding. You may have some bleeding and a dark grey discharge caused by the silver nitrate for approximately 48 hours. In order to prevent infection it is advisable to shower rather than bath and it is advisable for the next 2-3 days to use pads rather than tampons and you should avoid intercourse. You will receive a letter in approximately 4 weeks informing you of your results and follow-up if required.

If you have any questions or concerns you can contact our department on 01228 814245, to speak to one of our Colposcopy team, evenings and weekends you can contact Aspen Ward on 01228 814287

West Cumberland Hospital - Colposcopy secretary 01946 523219
Cumberland Infirmary - Colposcopy secretary 01228 814220

Travel Costs

You may be entitled to help with travel costs. For more information please contact the NHS Patient Services Helpline on 0845 8501166 (8am-6pm)

Confidentiality

'The Trust's vision is to keep your information safe in our hands.'

We promise to use your information fairly and legally, and in-line with local and national policies. You have a right to understand how your information is used and you can request a copy of the information we hold about you at any time.
